**Subject:** RE: 2026 POOL MAINTENANCE CONTRACT

Hi Dylan~

There are two S310T Hayward filters and one S244T Hayward filter on the pool.

The cost of a sand change for the S310T filters would be \$650 (500 lbs of sand and labor) for **each** filter.

The cost of a sand change for the S244T filter would be \$450 (300 lbs of sand and labor).

The total cost to swap the sand in all three filters would be \$1,750.

It is recommended that the sand be changed every 3-5 years depending on usage.

The cost to convert the filter media from sand to glass would be as follows:

Each S310T filter would cost \$1,650 (parts/labor) to convert to glass. Each filter will need 100 lbs of coarse glass and 350 lbs of fine glass.

The S244T filter would cost \$1,085 (parts/labor) to convert to glass. This filter will need 50 lbs of coarse glass and 200 lbs of fine glass.

Glass media lasts the lifetime of the filter and never requires replacing.

If you decide to proceed with swapping out the sand, you will need to provide us with a location where we can dispose of the old sand. The lead time on doing a sand change is going to be approximately 4-6 weeks.

Let me know if you have any questions or if I can be of further assistance.

Thank you,  
Michele
